Flowering Bulbs

Owing to the war conditions in Europe, Winter and Spring flowering bulbs are liable to be very scarce. I have been successful in securing one shipment of 5000 Paper White Narcissus, and offer same at the extremely low price of 40c per dozen. These bulbs, planted now, can be brought into bloom for Xmas.

BENNINGTON BRIEFS

News of the Town and Village Told Briefly for Busy Readers

Mrs. Laura B. Cole, grand matron of the grand chapter of Vermont O. E. S. went today to Orange, Mass., to attend the meeting of the Massachusetts grand chapter.

The Brotherhood will resume their regular bi-monthly meetings, beginning tonight at the Methodist church.

George P. Markham of Hoosick Falls will be the guest of the evening and will give a short address, to be followed by a social time and light refreshments.

There will be a double Greek wedding in Foresters' hall Thursday afternoon at 3 o'clock. The contracting parties will be Miss Mary Siders and Peter Savas of Oswego, N. Y., and John Costes of Auburn, N. Y., and Miss Mary Panos of North Bennington. The ceremony will be performed by Rev. Andreas Constantides of the Hellenic orthodox church of Schenectady. The ceremony will be followed by a reception.

FURRIERS PREDICT PEACE

Because Germans Have Not Prepared to Winter in Russia.

Milwaukee, Wis., Sept. 19.—Early peace in Europe is a probability, and the close of the campaign in Russia before midwinter is a practical certainty, according to Milwaukee furriers, following the receipt of authentic trade reports from Leipzig.

A statement that the military authorities had not placed the expected orders for furs and that all speculation in furs had ceased was responsible for these conclusions. A winter campaign in Russia, it is conceded, would be impossible without fur coats, caps and gloves.

HOW TO KEEP APPLES

State Experiment Station Reports on Dips and Packing Materials.

The Vermont experiment station has been making some elaborate investigations relative to farm apple storage, says the New England Home.

The results indicate that there is need of much improvement. Further attention may properly be given the preservation of a crop after it is produced. It is as important to preserve as it is to produce. Trials were conducted to learn the value of different mechanical media in the preservation of apples.

creation of apples. Mill sawdust, cork sawdust, leaves, chopped hay, paper, well as those dipped and placed in wrappers and sand were tried out. Shrinkage and decay losses were determined and estimates made as to the appearance and flavor. Only the mill sawdust and the cork sawdust seemed to possess value.

All the materials used kept the apples cooler than when one was used. However, shrinkage, decay and flavor injury were more fatal than the temperature. Mill sawdust from resinous woods imparts an undesirable flavor to apples. This is not true with hardwood sawdust.

Four kinds of protective dips were employed to detect their influence in the preservation of apples. Copper sulphate, bordeaux, lime water and paraffin were used as immersion fluids preliminary to storage. Bordeaux was most effective in retarding decay and preserving flavor. The apples kept best that were first immersed in bordeaux and then packed in hardwood sawdust. However, apples

ANNOUNCEMENT

BECAUSE of the constant demand for Ansco photographic supplies we have been persuaded to take the Ansco agency, and will henceforth carry all the popular models of Ansco cameras, Ansco films, Cyko paper, pure chemical and accessories.

ANSKO reputation was built up on professional cameras and the development into the amateur line has made an "amateur camera of professional quality". Every Ansco camera has special features not found in corresponding models of other manufacture. We have them from \$2.00 and upwards, including the handy little vest pocket size—the smallest camera made, taking pictures 2 1/4 x 3 1/4.

ANSKO FILMS are the court decreed original photographic film and possesses every essential feature for perfect picture taking. The new Ansco Speedex film gives harmonious color values, possesses high speed, non-halation and keeping qualities which take the "doubt" out of amateur photography. Made for all sizes and makes of cameras.

CYKO is the prize-winning print paper and has always been considered by those who use it the best paper made for amateur use. We have it in the various sizes and grades.

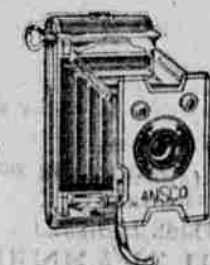

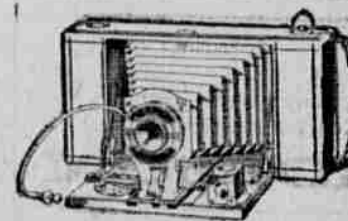

Come in and let us show you results obtained with ANSKO cameras and supplies

SCHOOL DAYS

Don't send your child to school until you KNOW whether or not its EYESIGHT is normal.

Your child's eyes play a most important part in its ability to study. Defective eyesight is a very frequent cause of apparent dullness or stupidity in your children.

Glasses worn in childhood avoid, in many instances, their constant use in later years.

We are Licensed and Registered Optometrists of many years experience, and if your child does not need glasses we will tell you so.

Our reputation and standing are sufficient assurance that we will not prescribe glasses unless your child's eyes can be benefited.

Let us examine your children's eyes thoroughly before sending them to school.
